Introduction

I've had the pleasure of training and working as a registered veterinary nurse since 2015, in various practices across Scotland. Simultaneously, I have been working towards a career in animal welfare research and am currently being funded by Dogs Trust as a PhD student in Clinical Veterinary Studies at the Royal (Dick) School of Veterinary Studies/The Roslin Institute as part of the University of Edinburgh. I currently support teaching as an associate tutor and guest lecturer on a variety of courses at The University of Edinburgh, having recently been awarded a Associate Fellowship in Higher Education Award (AFHEA). In progress: Founding a small scale charity that leases inner-city green space to local community groups for outdoor education projects in Edinburgh City.
